Company Summary

Litmus Technology is an Info. Tech. Business firm aimed at creating a digital solution for our day to day office activities, training office personnel and the coming generation for a digitalized world. Our top priority is to find solution to our day to day commercial activities using info. Tech.

In view of the recent developments in our world whereby digitalization has proffered solution to most of our day to day bottlenecks, and the fact that introducing digitalization will cut to a large extent money spent on administrative materials. We are offering to assist with transferring most of your analogue admin processes to digital or train your staffs to do so if need be.

We give your firm a face lift with attractive online presence . We also offer offline package where you handle you admin activities simlessly.
